

Evergreen Recycling & Disposal

3:32 PM

John E. Randolph
District Engineer

Ohio EPA out last week

Environmental Compliance

New section - C+D, asbestos, MSW

Asbestos Waste

- 1-2 day schedule
- put signs about hazard on truck
- cover load right away

Oil-water separator

City Sewer

Gas Extraction wells - 88 wells
159 acre active site

Sold gas to Toledo Refinery

Gas extraction sent Wallburn catalyst

~2,000 scfm to main line

Geomembrane liner

Capped w/ clay (bottom half done in mid-90's)

Yearly waste acceptance - 191,000 tons (2015)

35 more years to accept waste

2,500 ~~to~~ to 700

lighter packaging, more industry recycling
competition across

65% MSW, C&D, MWW sludge

H2O for one well, getting ready to end

Some exceedances in wellhead oxygen

Surface emission monitoring (SEM)

700ft limit

Vertical expansion 2007

OEPA had a complaint recently

Not many complaints, right wind

Finalizing plans for 5-6 redrills

Corporate does NMOC calculations

Brian ~~for~~ farmer - Gas tech (just this site)
does monthly

Gas plant shuts down or industry has issues,
flame right across road from gas plant

Always pilot flame
- Farmer question ~~✓~~

4:10PM Tour

WM might have bought
Quarterly scale calibrations

John been here 5 yrs

Diesel pumps & gasoline tank

injection of haz waste leachate

705-738 at peak, 30ft noise

20,000 gallon tank used for leachate recirculation
ended after a year

Used recirculation 1 yr ago (going ^{~2011} 2-3 yrs)

Storm pond in North end

Odor control used when doing solidification (ended 2010)

Bio-remediation system done a couple yrs ago

Compressor to run pumps/wells in southern section

Gas plant to take out moisture

soil & grass near active part

Cover every night w/ tarp

2012 in back section

horizontal collectors in top portion from odor complaint

(Clean) hard fill pile (cement + asphalt)
